

SUCCESS STORIES

“We have not stopped a single project thanks to smartShift during our first year of transition. All the business transformation that is needed to keep the business running continued as if the transition to SAP S/4HANA was not happening.”

Bruno Pont, Senior Director
Procter & Gamble

“Leveraging smartShift resulted in higher quality –and therefore more secure– SAP code.”

Cynthia Kendall, IT director,
Jabil

“smartShift’s accuracy is impressive. With 30 developers mitigating code manually, each with different styles, the accuracy would be questionable, and code would be inconsistent. Instead, it was error-free with smartShift.”

Colin Cole, IT director,
JBS Foods

Free Rapid Code Analysis

Contact us to find out how a Free Rapid Code Analysis can point you in the right direction to start your SAP modernization journey.

OUR DIFFERENCE

Intelligent Automation for SAP Transformations

- 3300+ transformation projects completed
- 3 billion+ lines of code transformed
- Millions of hours of manual labor eliminated

smartShift Intelligent Automation® is trusted by global brands to drive innovation. We help customers accelerate the transformation of their SAP systems to embrace digital modernization, freeing up strategic resources to focus on growth and innovation.

Backed by more than a decade of research and development, smartShift's patented technology is a proven way to modernize and future-proof your SAP investments with unparalleled agility and guaranteed results.

Future-Proof Your Business With Guaranteed Results

Automated Dual Maintenance

smartshift.com

OUR SAP SOLUTIONS

Code Analysis and Transformation

Decrease project risk with AI-powered code analysis and remediation for Unicode, HANA, and S/4HANA.

Code Dual Maintenance & Retrofit

Automate code comparison, merging, and transformation to eliminate gaps at go-live.

Clean Core Analysis

Build your Clean Core road map with smartShift's proprietary insights into adopting SAP's new paradigms.

Code Security

Find and fix every security vulnerability in your custom code, without business disruption.

Code Consolidation & Carve-Out

Shorten project duration by 75% during time-sensitive mergers, acquisitions, and divestitures.

Code Stability & Resilience

Identify and fix stability and resilience issues in SAP custom code with a comprehensive approach.

RISE with SAP

Pave the path to realizing the benefits of RISE with SAP with a focused, faster, and simpler implementation approach.

Code Decommissioning

Reduce security risk and remove technical debt by safely eliminating and archiving unused code.
