

GET THE MOST OUT OF YOUR SAP® SUPPLY CHAIN WITH BARCODE-IT

At Barcode-IT, we know how important it is to get the right advice before purchasing any supply chain solution for your business. That's why we offer our customers a truly agnostic consultancy and project management service when they come to us with SAP® mobility projects. We partner with experts in every sector: SAP® mobile client developers, data capture and barcode printer manufacturers and device management solutions, to ensure we can offer our customers a fully specified and supported mobility solution for their business.

Our 30 years experience in the barcoding industry and experience working with SAP® customers, enable us to act as a consultant on all aspects of your project, meaning that you can speak to one company, yet get access to all of the leading software and hardware solutions on the market. This has recently been recognised by SAP® and we have been accepted into the SAP® PartnerEdge® programme, which enables us to further our knowledge of SAP®, to provide an even better level of service to our customers.

ABOUT US

EXPERTS IN LOGISTICS

With over 30 years of experience in supply chain and logistics management, we have the knowledge to advise your business how to get the most out of SAP®. Working with some of the UK's largest businesses, we have gained a wealth of experience and solutions for every day problems when running SAP® in manufacturing and distribution.

DEDICATED TEAM

Our highly knowledgeable team will listen to your company requirements and make recommendations on how to achieve best practise. They will be on hand to guide you throughout the whole process; from design and implementation, to support following go live.

COMPREHENSIVE SOLUTION

We can recommend everything you need to implement a comprehensive supply chain solution; software applications, wireless networks, data capture devices, printers, location labels and after sales support and maintenance. No need for multiple suppliers, we can provide everything you need and a single point of contact.

SOFTWARE INTEGRATION

We work with customers running all types of SAP software: S4/HANA®, ECC6, HEC and SAP Business One®. We provide solutions for SAP® modules including IM, WM, EWM, MM, PM, QM and POD.

OUR SERVICES

At Barcode-IT, we offer our customers a single point of contact for their SAP project. We manage and co-ordinate all elements of the project, removing the blame game that often occurs when something doesn't work as expected and continue to support once the project has gone live.

OUR CUSTOMERS

The team at Barcode-IT have been the key ingredient to making the rapid deployment of our first SAP barcoding solution possible. We have been able to leverage their extensive industry knowledge and wealth of contacts, to create a bespoke solution that exactly matches our growing business needs. We are confident that all our hardware requirements will be expertly managed during the forthcoming implementation phase

- Lee Retson, Purchasing Manager

Barcode-IT gave us excellent advice when migrating from Windows to Android hand held terminals to run with SAP. Following a site visit we were left with fully configured equipment to trial and on-going technical support, whilst the proof of concept had been completed, which in the end saved us a significant amount on the project. They are now our primary partner for supplying solutions that drive our SAP warehouse operations.

- Paul Brough, Network Administrator

We have had a relationship with Barcode-IT for many years and they have helped us successfully deliver a number of major projects. Their technical knowledge of warehouse hardware & infrastructure is unmatched and we have benefitted greatly from this experience. Barcode-IT are our GoTo company for SAP warehouse devices & support.

- Graeme MacKinnon, IT Manager
