XACTITUD

Tasked with implementing the Digital Access Estimation Note? How do you ensure its accurate and you've captured everything?

Check out these 3 simple tips:

XACTITUD

1. Execute for last full calendar year e.g., 01/01/2023-31/12/2023 … **BUT** also for multiple years if there have been any significant integration changes from year to year.

2. Filter to select *only* non-Dialog technical user types … **BUT** if you have any BOTS with a Dialog technical user type, include those too (especially non-SAP RPA!).

3. If there are plans to automate tasks performed by existing SAP named users using third-party automation functionality, it's useful to execute the report filtered to these users to check for the Digital Access impact.
