

Securing Your Systems in a Digital World

Meeting to be held on Wednesday 5th July 2017

At The Vox Conference Centre, Resorts World

Birmingham, B40 1PU

Cyber Security Stream Information

Cyber Security Stream		
Time	Session	Company & Speaker
13:30	<p>Best Practices for Cloud Provider Data Security</p> <p>Data security, compliance and control are top enterprise concerns when considering a cloud service. Organizations are dealing with increased data security requirements from executives, customers, governments and regulatory agencies. In this session learn the data security best practices for cloud providers and review how cloud provider Virtustream implemented strong data security for SAP.</p>	<p>Andy Sugden</p> <p>Virtustream</p>
14:20	<p>Security in SAP HANA, SAP S/4 HANA and SAP Fiori</p> <p>Johan will talk about the ways to set up access rights in the new HANA platform. The way users and access rights work in SAP HANA, SAP S/4HANA and SAP Fiori environments will be explained thoroughly. Participants will learn how they can re-use or adapt existing user access concepts from the ABAP environment in the new HANA platform.</p>	<p>Johan Hermans</p> <p>CSI tools</p>
15:35	<p>SAP Live Hacking – Is your “Business DNA” protected???</p> <p>Around 150.000 organisations, including 90% of the top 2,000 companies entrust their business to SAP systems. These firms depend on their SAP application security and stability for many key business transactions. With these systems, any downtime or decline in performance can have dire consequences.</p> <p>Virtual Forge are the experts of Security, Compliance and Quality assurance products and services that manage SAP® systems and applications in the most critical environments like e.g. Military, Banking & Insurance, Oil & Gas, Manufacturing, Healthcare and federal institutions. In addition, Virtual Forge acts as a competence partner for SAP. This includes reporting new identified vulnerabilities as well as the delivery of SAP security solutions like “SAP Enterprise Threat Detection”.</p> <p>Virtual Forge will demonstrate the importance in protecting your SAP System by demonstrating a live hack on stage and how easy it is to misuse vulnerabilities for a hacker.</p>	<p>Manfred Hofmann & Marco Hammel</p> <p>Virtual Forge</p>
