13:30	<p>Putting General Data Protection Regulations into Practice for SAP Information</p> <p>GDPR is already law and companies have until May 2018 to ensure that they are compliant or risk a fine of up to 4% of their global turnover. The GDPR regulation is so vast no single solution in the market can address all of it. Single solutions only address a subset of it, often small. Furthermore, there is no single most important area to focus on to the exclusion of any other. It is not 'just' about data, but how data is used and managed within an organisation.</p> <p>Every customer will have their own legacy IT footprint that will have an impact on what systems need to be brought under GDPR compliance. SAP have the unique advantage of best of breed solutions when used together to provide a comprehensive platform that will help organisations demonstrate GDPR compliance: for both SAP and non-SAP systems.</p> <p>Assist with key GDPR Requirements - Document governance requirements for SAP</p> <ul style="list-style-type: none">• Locate GDPR relevant Data, Purpose, Risk• Procedures, Explicit Consent, Blocking, Deletion and Detecting Data Breaches• Accountability, Sustainable, Comply <p>The GDPR requirements impact data not only in HR but across the whole spectrum of the SAP Landscape including SRM, CRM, ECC SD,MM etc. Companies Data Processing Officer / Compliance Officer should now have started to put together their GDPR Strategy. Within this presentation SAP customers will be shown how we can help to fulfil that strategy with SAP Best Practice tools.s</p>	Oscar Trompe SAP
14:20	<p>SAP Cloud Trust Center</p> <p>SAP provides transparency of its Cloud Services with the new SAP Cloud Trust Center, a public website with unified and easy access to all SAP cloud trust-related content. The SAP Cloud Trust Center delivers transparency with ease of access on SAP cloud related processes and availability of for all critical areas of business enabling technologies - from compliance to live cloud service availability. The SAP Cloud Trust Center serves as an accelerator in the decision making process of prospective and current</p>	Heike Fiedler-Phelps, Product Owner SAP Cloud Trust Center

	<p>customers since it will provide all required information up front and not only upon request. It is a trusted source where users can initiate requests, such as for SOC reports, engage with SAP, and collect all assets and information they need, when they need it. Find out more about the SAP Cloud Trust Center and see a live demo.</p>	
15:35	<p>Single Sign-On and the changes over the years, including their roadmap for future releases</p> <p>Single Sign-On is part of the puzzle for GDPR compliance; helping support an organisation's user authentication strategy and implementing operational access controls to reduce the risks of suffering a data breach - caused by employees and contractors writing down their system passwords on a post-it note.</p>	<p>Cavan Arrowsmith</p> <p>SAP</p>
